Software developer (m/f/x)

orca
CAPITAL

Your tasks at Orca Capital:

➢ Create clean and efficient code based on specifications and requirements of our stakeholders (requirements engineering)
➢ Develop new features for our proprietary inventory management system
➢ Extend our test framework and test automation in Java and E2E
➢ Ideally, you prepare the generated data in our BI tool (Tableau)
➢ Plan and conceptualise the on-demand hosted hardware infrastructure in cooperation with our system administrators
➢ Implement and maintain our internal and external interfaces

You should have the following skills:

➢ Degree in computer science or comparable knowledge
➢ At least three years of professional experience in software development
➢ Relevant knowledge of Java and Kotlin
➢ Knowledge of CI tools and container orchestration, such as Maven or Gradle and Docker
➢ Experience with version management software, such as GitLab
➢ Working experience with monitoring systems, such as Grafana, Prometheus and ELK-Stack
➢ Good knowledge of SQL, especially for PostgreSQL
➢ Strong analytical, solution-orientated and independent way of working
➢ Characterised by good teamwork and communication skills

About Orca Capital:

➢ Above-average monthly fixed salary
➢ Independent work in a very young, agile team
➢ Management is always open to new ideas and supports you in implementing them
➢ Flat hierarchical structures • Employees can set up their workplace with the latest technology, the same applies to the home office workplace
➢ Our Feel Good Manager takes care of all individual needs
➢ Provided, varied lunch every working day
➢ Free gym membership
➢ A foosball table, table tennis and pinball machine are available in our games and leisure room to take a breather
